

How to add Social Urls and Email ID

After activating this theme

Login wordpress admin go to **Appearance -> Editor**. select the theme and click on the file 1Social_contact.php as shown in the below image you will see the code in left side editor change your social details and contact Email Id.

The screenshot displays the WordPress Admin Dashboard with the 'Appearance' menu selected. The 'Edit Themes' section is active, showing the 'Fotos Under Construction' theme. The '1Social_contact.php' file is selected for editing. The code in the editor defines social media URLs and an email ID.

```
<?php
/*
 * Set your Social Pages Urls and Subscription Email ID in this Page
 */
*/

// Email ID to which subscription Emails to be sent
$email_id="s.hidayath@gmail.com";

// FaceBook page Url
$facebook = "http://facebook.com/vpmthemes";

// Twitter Url
$twitter = "http://twitter.com/vpmthemes";

// Google Plus Url
$gplus = "http://plus.google.com/+w3layouts";

//
?>
```

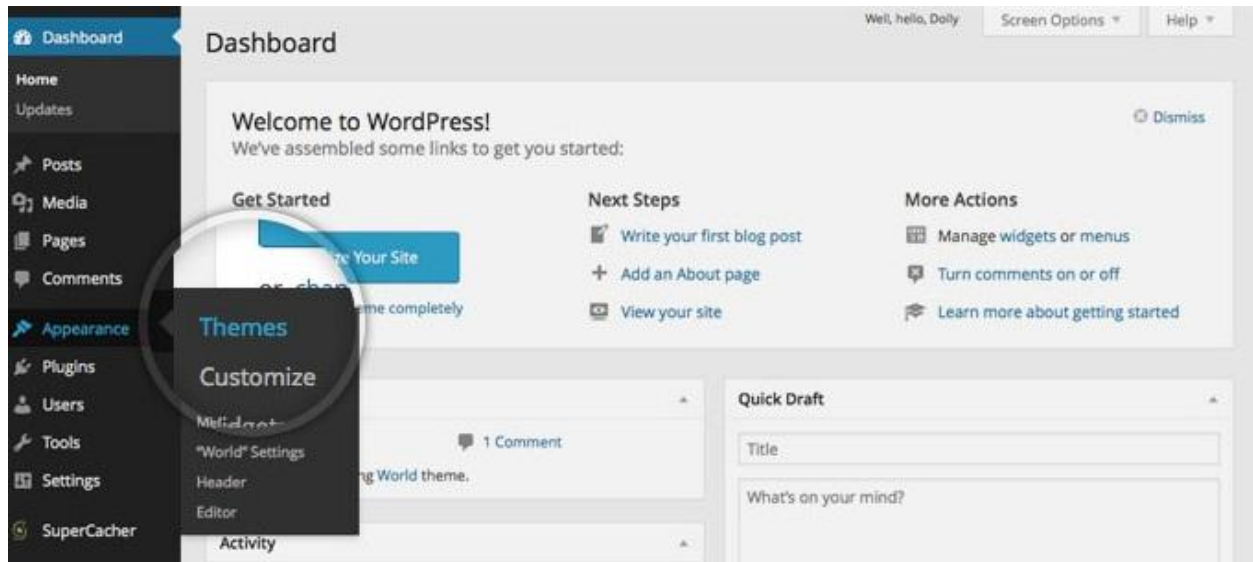

On the right side, the 'Templates' list includes:

- 1Social_contact.php
- 404 Template (404.php)
- Archives (archive.php)
- Comments (comments.php)
- content-none.php
- content-page.php
- content-single.php
- content.php
- footer-mobile.php
- footer-smartphone.php
- Footer WEB Page Template (footer-web.php)
- Footer (footer.php)
- Theme Functions (functions.php)

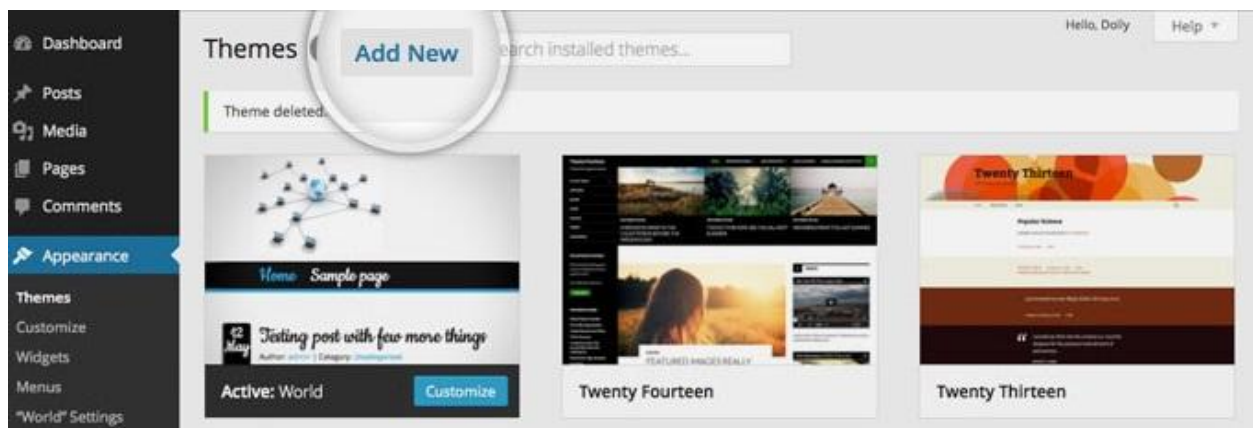

How to Install and Active Wordpress Theme

After you download the wordpress theme zip file from WPMthemes.com follow the steps below to install and make it Active.

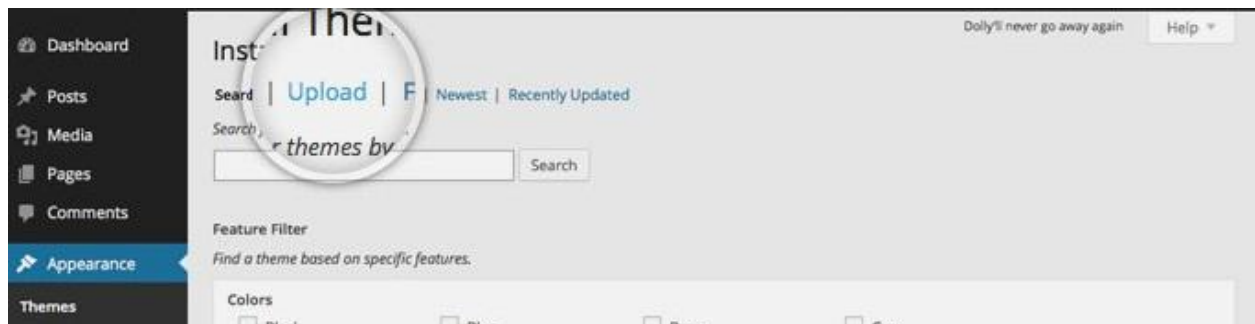

The first thing you need to do when you want to install a new WordPress theme is to login to your site admin page. Once there, go to **Appearance -> Themes**.

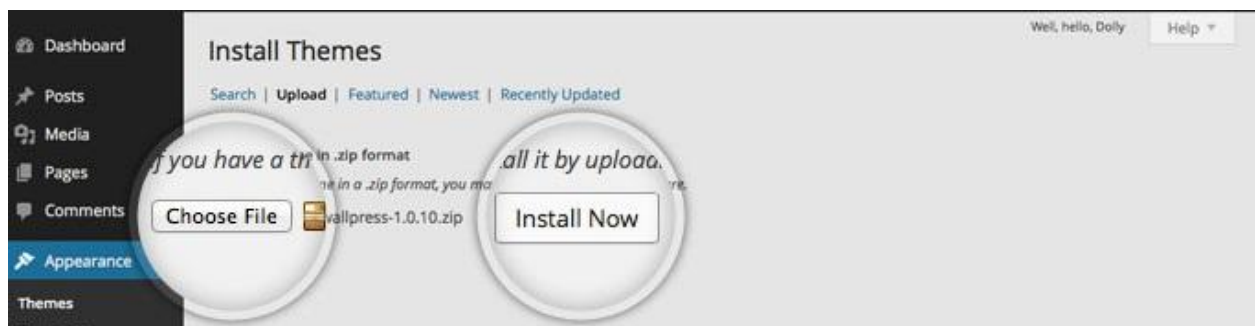

Here, you will see all the themes you have currently installed in your application. To add another one, simply click on the **Add New** tab.

Click on the **Upload** link at the top of the page.

Now, click the **Choose File** button, select your theme from your local computer and press the **Install Now** button.

In few seconds or minutes depends on your internet speed, WordPress will upload and extract the theme archive for you. All you need to do next is to press the **Activate** link under the message for successful theme installation.

That's it! Your new wordpress theme is installed and active. You can now go to the front end of your site and see the newly activated theme
